Mission Statement

We are committed to employing innovative roofing technology and are dedicated to building watertight relationships with each of our clients, suppliers and employees.

Summary

Texas Fifth Wall Roofing (Fifth Wall) is an award-winning commercial roofing innovator providing new construction and reroofing installations of single-ply, metal and composite systems. As the region's largest provider, our service department offers repair and maintenance services for all types of commercial, industrial and retail properties. Forward-thinking responsiveness to customer needs and the firm's commitment to integrity over the bottom line have established Fifth Wall as a leader in the roofing industry.

History

Founded in 1973 by Rick Fleming, Texas Fifth Wall Roofing first gained prominence by pioneering the installation of single-ply elastomeric roofing membranes, now a fixture in today's Central Texas commercial roofing market.

The company grew steadily during the 1980s, creating the largest full-time service department specializing in leak repair and preventive maintenance in Texas.

Today, Fifth Wall remains at the forefront of innovative roofing technology nationwide, offering better technology, better service and a higher level of professionalism.

The driving force behind our steady success is our commitment to technology and dedication to building watertight relationships with our clients, suppliers and employees.

Awards & Accolades

Only company west of the Mississippi River to receive over 900 perfect scores from roofing manufacturer, Carlisle
Excellence in Single-ply for eight years

About Texas Fifth Wall Roofing

Texas Fifth Wall Roofing is an industry award-winning commercial roofing innovator providing new construction and reroofing installations of single-ply, metal and composite systems. As the region's largest service provider, Fifth Wall's service department offers repair and maintenance services for all types of commercial, industrial and retail properties. The forward-thinking responsiveness to customer needs and the firm's commitment to integrity over the bottom line have established Fifth Wall as a leader in the roofing industry.

As a pioneer in innovative commercial roofing technologies in Texas, the company is an early provider and specialist in single-ply roofing installation and utilizes green technologies including solar and vegetated roofing systems. Fifth Wall is the first regional roofing company to deploy fully inventoried service vans, which enable well-trained Service Technicians to provide highly responsive repair services on all types of commercial properties.

Fifth Wall has a proven production process that assures accountability in meeting construction deadlines, reducing risks and disruptions to building operations. The company's adherence to industry best practices in quality control and safety lowers project insurance risks and, subsequently, costs for clients. Deep industry

expertise aligned with seasoned leadership results in best-in-class service, which has been acknowledged by prestigious industry awards.
